Make your life easier: simplify your research informatics

Imagine that you can fully focus on your research business: developing effective new products and services that matter. You require a partner who understands the life sciences business. A partner who adds value to your research processes and provides the proper informatics solutions fit for use. A partner who enables you to focus on even more and better business output. Vivenics is committed to become your valued partner and to make your life easier.

Vivenics provides solutions for life sciences R&D organisations in the field of lab productivity, data management and process optimization. Our solutions will ensure processes to run more efficiently

Research Informatics challenges of today

Labs are transforming from paper-based processes into electronic solutions for data acquisition and data management. This causes an explosion of data. Today R&D management faces challenges to manage all data in different systems and to integrate these for analysis and take the right decisions.

Navigate towards your goals with projects that fit your needs

Our consultants have extensive experience in the field of Research Informatics. Vivenics provides consultancy, project management and business process analysis & improvement. Add Vivenics staffing to your informatics project team and it will be easier for you to accomplish your project goals.

Configure your own Research Informatics Platform

On our Research Informatics Platform you can create your own toolbox for an

integrated data management solution by selecting the modules that are relevant to you. Vivenics collaborates with renowned informatics partners and offers solutions for ELN, sample tracking, biological data management and decision support tools. Our modules are available in a 'Software as a Service' (SaaS) business model, and we continuously improve and extend these modules in order to prepare for your future demands.

One-stop shop includes generic ICT

If you're located on the Life Sciences Park Oss you can also benefit from our presence for your generic ICT services. These services include office automation, shared printing facilities, network connectivity & security, VoIP services and various data center services in a private cloud environment. Vivenics works with expert partners to ensure that complex infrastructure is provided as simple as water from a tap.

Partner with Vivenics

Would you like to focus more on your core business? Partner with Vivenics and make your life easier.
